2. PROPERTY ADDRESS

Property Type: Residential Commercial Multi-tenement (units) Land Subdivision

Lot No: _____ PS/LP No: _____

Street No: _____ Street Name: _____

Town: _____ Postcode: _____

3. INFORMATION PROVIDED BY GIPPSLAND WATER

Gippsland Water will provide you with an asset location plan; a water field note and a sewer field note where this information is available. If the information requested is for a subdivision then as constructed engineering plans will be provided.

Please note that Gippsland Water is not able to provide asset location plans and field notes where Practical Completion &/or Compliance has not been granted for a subdivision.

In providing the asset location plan(s) the following clearances are required in accordance with The Water Act 1989 – Section 148.

For Water: No structure (with the exception of a driveway crossover) is permitted over a water main. Crossovers are not permitted over the tapping band/ferrule (where the property service pipe meets the water main). Water meters are only permitted in a trafficable pit in a driveway where the water main and ferrule are located on the opposite side of the road.

For Sewer: All structures (above and below ground) are required to maintain a **minimum 1 metre clearance** from the outside edge of any above and/or below ground sewer asset (sewer main, property connection point, manhole etc.)

Water & Wastewater/Connection Applications: Please ensure that the connection points (which will be provided in response to this application) are shown (including measurements to all nearby proposed structures) on any site plans submitted to Gippsland Water for Water & Wastewater Connections Applications.

Please Note Turnaround Times: Gippsland Water aims to have this request will be processd within 5 business days. Please note time allowances for other applications to Gippsland Water; allow 5 business days for a Building Approval Request; allow up to 5 business days for issuing of a standard residential connection with pre-tap connection; allow up to 10 business days for a quote response and allow up to 10 business days for a main to meter or buried service installation
