Notes:

1. Compaction testing shall be completed in accordance with:
 - MRWA Sewer Acceptance Testing Specification 13-01.1, Section 4 'Compaction Testing', and
 - MRWA Backfill Specification 04-03.2, Section 6 'Compaction Testing', and
 - WSA 02-2014-3.1 MRWA Edition, Section 21.3 'Compaction Testing'
2. Embedment compaction testing is typically unnecessary for mains ≤ DN300.
3. Contractor to recompact and retest any section that fails to comply with minimum compaction requirements.
4. Consultant to review material testing report and verify test section(s) meet acceptance criteria outlined in the code / specifications.
5. Material testing report to be provided to Gippsland Water as part of construction verification submission.
