

WATER RESTRICTION BY-LAW 17

GUIDELINES FOR WATER USE PLANS UNDER CLAUSE 7

1. Introduction

In times of drought or water shortage, it may be necessary for Gippsland Water to impose water restrictions in certain areas in order to conserve available water supplies. A copy of the water restrictions is attached.

In order for us to minimize where possible the impacts of such restrictions on our customers, we will allow affected customers to submit Water Use Plans to Gippsland Water for approval.

If approved, a Water Use Plan will allow a customer to use water in a particular way despite the current prevailing restrictions. They may also be required to be completed by customers applying for exemptions to water specific areas, such as public garden areas and playing surfaces.

For more information and to complete a Water Use Plan Application form and/or an Exemption Application form, visit <https://www.gippswater.com.au/residential/help-advice/saving-water/water-restrictions>.

2. Criteria

In order to be considered for approval by Gippsland Water, a customer's Water Use Plan must include details of:

- The person/s and property to which the Water Use Plan applies;
- The use/s of water to which the Water Use Plan applies;
- The stage/s of water restrictions during which the Water Use Plan applies; and
- The time at which the Water Use Plan will expire or cease to apply.

A successful Water Use Plan must satisfy Gippsland Water that the customer's proposed use of water would not detract from the purpose of the prevailing stage of water restrictions. As such, Gippsland Water will only approve a Water Use Plan if it meets at least one of the following criteria:

- The use of water under the Water Use Plan would result in water savings commensurable to those that would otherwise result from the prevailing stage of restrictions.
- The use of water under the Water Use Plan (along with other similar exemptions which have been or are likely to be granted) would not have a significant impact on the total daily demand for water by customers or the security of available water supplies in the district where the use will occur.
- The approval of the Water Use Plan would generally be supported by other affected customers of Gippsland Water.
- The use of water under the Water Use Plan would demonstrate a best practice or highly efficient use of water for the given purpose. or
- The approval of the Water Use Plan would provide a broader public benefit.

Gippsland Water retains the right to approve a Water Use Plan in full or subject to any conditions considered appropriate for the conservation of water, or to refuse the application for any reason. An approved Water Use Plan can only be construed as permission to perform the particular activity specified in the Water Use Plan and will not allow any further deviation from the prevailing restrictions.

3. Activities which may be permitted by a Water Use Plan

Depending on the particular stage of restriction that is imposed on the customer, a Water Use Plan may be necessary to permit the performance of a number of particular uses of water. Customers may have to submit Water Use Plans for the following activities:

3.1. Watering gardens, lawns, and playing surfaces

During water restriction stage 1, 2, or 3, a customer can obtain an approved Water Use Plan for watering a public garden or lawn area or playing surface as required. If successful, a customer applying for a Water Use Plan for this purpose will not be subject to restriction requirements such as only being allowed to water these areas at certain times or with a hand-held hose with a trigger nozzle, bucket, or watering can.

A Water Use Plan for this purpose will not be approved if the customer is in an area with a prevailing stage 4 restriction.

3.2. Using water for aesthetic purposes

During a stage 1 water restriction, an approved Water Use Plan will allow a customer to fill or top up a new or existing pond or lake with a capacity of greater than 2,000 litres. This will not be permitted by any means in the absence of a Water Use Plan, although a pond or lake with a capacity of 2,000 litres or less may be filled or topped up with a hand-held hose with a trigger nozzle, bucket, or watering can under stage 1 restrictions without a Water Use Plan.

During a stage 2, 3, or 4 water restrictions, an approved Water Use Plan will be required to allow a customer to fill or top up an existing pond or lake of any capacity. Applications for this purpose under such restrictions may only be approved where the relevant pond or lake sustains aquatic fauna or bird life, otherwise customers under these restrictions will not be permitted to fill or top up a new pond or lake for any reason.

3.3. Using water in swimming pools and toys

During a stage 1 or 2 water restrictions, a customer must obtain an approved Water Use Plan in order to fill a new or existing residential, commercial, or public pool or spa with a capacity of greater than 2,000 litres, or to fill or top up a mobile spa owned by the customer. A Water Use Plan may be approved to top up a new or existing residential, commercial, or public pool or spa of any capacity under stage 2 restrictions. If this is not obtained, the customer will be restricted as to the time and/or manner in which they are allowed to perform this activity (specific restrictions available on the Gippsland Water website). Water Use Plans to fill or top up mobile spas or residential or commercial pools will not be approved under stage 3 or 4 restrictions.

An existing residential or commercial pool or spa, or a new or existing public pool or spa may be topped up (but not filled) with the approval of a Water Use Plan under stage 3 restrictions. Without a Water Use Plan, the customer will be restricted as to the time and/or manner in which they are allowed to perform this activity as above. A Water Use Plan for this purpose will not be approved where stage 4 restrictions apply.

An approved Water Use Plan is also necessary for the filling of a new or existing public pool or spa of any capacity under stage 3 or 4 restrictions. Similarly, a customer must obtain approval to top up such a pool or spa under stage 4 restrictions.

3.4. Storing or transporting water

A customer that wishes to use water to fill or top up a dam or tank will be required to obtain an approved Water Use Plan under any prevailing stage of restriction, except where the water in the dam or tank is to be used:

- For fire-fighting, stock-watering, or other public health purposes (but then only to the extent which it is reasonably necessary for those purposes);
- For domestic purposes inside a dwelling; or
- For any other use of water permitted by means of a hand-held hose with a trigger nozzle under the prevailing stage of restrictions.

3.5. Cleaning vehicles with water

Under any stage of restrictions, a Water Use Plan will need to be approved in order for a customer to use water to clean a vehicle for mass transportation.

In order to use water to clean a vehicle at the premises of or by a motor vehicle dealer, repairer, or detailer during a period of stage 1, 2, or 3 restrictions, a Water Use Plan may be approved. If this is not obtained, such an activity will be restricted to being done by means of a high-pressure water cleaning device, a bucket or watering can, or a commercial car-wash in accordance with water restrictions. Water Use Plans for this purpose will not be approved under a stage 4 water restriction.

Under stage 1 or 2 water restrictions, the water use for cleaning of vehicles at a commercial carwash is restricted to a carwash which uses no more than 70 litres where built on or after 1 July 2012, or 100 litres where built before 1 July 2012, of water per vehicle washed. A Water Use Plan will need to be approved for any customer wishing to operate a commercial carwash outside of these requirements. For stage 3 restrictions any use of water to clean cars at a commercial carwash that uses 70 litres or more of water per vehicle (regardless of when the car-wash was built) will require an approved Water Use Plan. Water Use Plans for this purpose will not be approved under a stage 4 water restriction.

3.6. Using water for other cleaning or maintenance purposes

An approved Water Use Plan may be obtained for the purpose of suppressing dust where the dust is causing (or is likely to cause) a health or environmental hazard. If a Water Use Plan for this purpose is not obtained, a customer will be restricted to performing this activity with a hand-held hose with a trigger nozzle, bucket, or watering can, or with water from a water tanker in accordance with water restrictions. Such a Water Use Plan will only be approved under stage 4 restrictions where there is no suitable alternative source of water available for use.

3.7. Using water for commercial production of plants and/or animals

Under stage 3 or 4 water restrictions, an approved Water Use Plan must be obtained in order to use water at a commercial or Council plant nursery or market garden except for watering by means of a hand-held hose with a trigger nozzle, bucket, or watering can.

WATER RESTRICTIONS

Category of water use	Stage 1 (Alert)	Stage 2 (Save)	Stage 3 (Just Enough)	Stage 4 (Critical)
1. Watering Gardens, Lawns and Playing Surfaces with Supplied drinking water	(a) A: <ul style="list-style-type: none"> residential or commercial garden or lawn area; or public garden or lawn area; or general or particular playing surface, cannot be watered with supplied drinking water except as required and then only: <ul style="list-style-type: none"> with a hand-held hose, bucket or watering can at any time; or by means of a watering system but only on alternate days between the hours of 6am and 10am and 6pm and 10pm. 	(a) A: <ul style="list-style-type: none"> residential or commercial lawn area; or public lawn area; or general playing surface, cannot be watered with supplied drinking water at any time.
