Gippsland Water

We're moving to quarterly billing

Next year, we're introducing quarterly billing, which means you'll get a bill from us four times a year. Right now, you receive a bill three times a year.

The change will start from 1 July 2027.
It means the annual cost of your bills will be spread over four bills, instead of three. By breaking payments into smaller amounts, quarterly billing can help make budgeting easier.

If you're currently on a payment plan, your payments won't change, and no action is needed.

Find out more about your bill:

Every drop counts.

Reducing your water use is important for protecting our water resources and ensuring there is enough water for our community, for future generations.

By making small changes to the way we use water every day, we can all help conserve this valuable resource and support a sustainable future for Gippsland.

Simple actions you can do to reduce your water use:
